Introduction

The Web-Based Driven HIV Patient Record, Case Tracking, and Treatment Access System for LoveYourself HIV Treatment Hubs is a secure web application developed to improve the management of HIV-related healthcare services. The system enables clinic personnel to efficiently manage patient records, appointments, treatment information, case tracking, and educational resources through a centralized platform. It also allows users to conveniently access healthcare services, schedule appointments, monitor treatment information, and receive important notifications online.

The system supports multiple user roles with different levels of access, ensuring that sensitive medical information is only accessible to authorized personnel. It also incorporates security mechanisms such as role-based access control and One-Time Password (OTP) verification to help protect confidential patient data. Additionally, the system includes an AI-powered chatbot that provides HIV-related educational information and assists users in navigating the system.

Purpose of the System

The primary purpose of the Web-Based Driven HIV Patient Record, Case Tracking, and Treatment Access System is to provide LoveYourself HIV Treatment Hubs with a centralized and secure platform for managing patient records, appointment scheduling, treatment monitoring, and case tracking.

Specifically, the system aims to:

- Improve patient monitoring and follow-up management.
- Simplify appointment scheduling for both patients and clinic personnel.
- Securely store and manage confidential patient records.
- Support coordination between LoveYourself treatment hubs through organized patient record management.
- Provide automated appointment and follow-up notifications.
- Offer HIV educational information through an AI-powered chatbot.
- Improve the efficiency and quality of healthcare service delivery.

Scope

This user manual is intended for all authorized users of the system, including Clinic Administrators, Record Managers, Appointment Coordinators, Health Education Coordinators, and Registered Users.

The manual provides instructions on how to:

- Register a new user account.
- Log in securely using OTP verification.
- Navigate the system dashboard.
- Manage appointments.
- Access healthcare services.
- Complete assessment forms.
- Manage patient records.
- View notifications.
- Use the AI chatbot.
- Manage user profiles.
- Perform administrator functions such as appointment management, user management, educational content management, prescription management, and report monitoring.

This manual serves as a guide for the proper operation of the system and does not cover software installation or system maintenance procedures.

System Overview

The Web-Based Driven HIV Patient Record, Case Tracking, and Treatment Access System is designed to improve the efficiency of HIV healthcare services provided by LoveYourself HIV Treatment Hubs.

The system replaces manual and fragmented processes with a centralized web-based platform that enables secure patient information management, appointment scheduling, treatment monitoring, case tracking, and healthcare service coordination.

Different user roles are provided with appropriate permissions to ensure confidentiality while allowing authorized personnel to perform their respective responsibilities efficiently.

Major system modules include:

- User Authentication
- Patient Record Management
- Appointment Scheduling
- Case Tracking
- Treatment Management
- Educational Awareness
- AI Chatbot
- Notification System
- Reports and Analytics

System Description

The system provides an integrated healthcare management platform that allows clinic personnel to manage patient information while enabling patients to access healthcare services online.

The application includes the following major functions:

- **Authentication Module**

Provides secure login using email, password, and One-Time Password (OTP) verification. User access is controlled through role-based permissions.

- **Patient Record Management**

Allows authorized personnel to create, update, and securely manage patient medical records while enabling users to access their own information.

- **Appointment Management**

Enables users to schedule healthcare appointments online. Clinic personnel can approve, modify, or monitor appointment schedules using the calendar interface.

- **Treatment Management**

Allows healthcare providers to manage treatment information, prescription records, medication refills, and patient progress.

- **Case Tracking**

Supports the monitoring of patient cases throughout their treatment journey to ensure continuity of care.

- **Educational Awareness Module**

Provides HIV-related educational materials and announcements that can be managed by authorized administrators.

- **AI Chatbot**

Provides users with HIV-related educational information and assists them in navigating the system using natural language conversations.

- **Notification System**

Automatically notifies users regarding appointment schedules, treatment reminders, and important system updates through email and in-system notifications.

- **Reports and Analytics**

Provides administrators with statistical reports, graphical analytics, and system summaries to support monitoring and decision-making.

System Requirements

Before accessing the system, users should ensure that their devices meet the minimum hardware and software requirements to achieve optimal performance.

Hardware Requirements

- Device Desktop Computer, Laptop, Tablet, or Smartphone
- Internet Stable Internet Connection

Software Requirements

The following software is recommended for accessing the system:

- Google Chrome Latest Version
- Microsoft Edge Latest Version
- Mozilla Firefox Latest Version
- Windows 10 or later
- Android 10 or later
- Active internet connection for catalog, checkout, notifications, and admin operations

Administrator User Guide

Administrator Login

The Administrator Login allows authorized clinic personnel to securely access the system. The system uses email, password, and One-Time Password (OTP) verification to ensure that only authorized administrators can access sensitive patient information.

Procedure:

- Open the Login Page to input your admin credentials.
- Click the Conitnue button.
- Enter the OTP sent to the registered email address.
- Click Verify.
- The system redirects the administrator to the Dashboard.

Expected Result

The administrator successfully logs in and gains access to the dashboard according to their assigned role.

Administrator Dashboard

This illustrates the Administrator Dashboard, which provides an overview of the system. It displays statistical summaries such as the total number of users, appointments, providers, prescriptions, and other system activities.

Procedure

- Login as Administrator.
- Review the dashboard summary cards.
- View recent appointments and activities.
- Navigate to different modules using the sidebar menu.

Expected Result

The dashboard displays current system statistics and provides quick access to administrative functions.

Administrator Profile

The Administrator Profile allows administrators to view their account information and manage security settings.

Procedure

- Click Profile.
- Review account information.
- Update profile information if necessary.
- Change the account password.
- Save the changes.

Expected Result

The administrator profile is updated successfully.

Analytics Dashboard

The Analytics Dashboard presents graphical reports and statistical summaries of users based on different categories such as current address and clinic statistics.

Procedure

- Open Dashboard Analytics.
- Review charts and graphs.
- Analyze user distribution.
- Export reports if necessary.

Expected Result

Statistical information is displayed to support monitoring and decision-making.

Appointment Management

The Appointment Management module enables administrators to monitor, approve, reject, or update appointments.

< Prev 1 2 3 Next >

Procedure

- Select Appointments from the navigation menu.
- Search for a patient appointment.
- Review appointment details.
- Approve, reject, or reschedule the appointment.
- Save the changes.

Expected Result

The appointment status is updated successfully.

Appointment Scheduling Calendar

The Appointment Scheduling Calendar provides a calendar view of available, booked, and closed schedules.

Procedure

- Open the Calendar module.
- Select the preferred date.
- View scheduled appointments.
- Add, edit, or close appointment slots.
- Save the schedule.

Expected Result

The appointment calendar is updated and reflected in the booking system.

User Management

The User Management module allows authorized administrators to manage user accounts.

Procedure

- Open User Management.
- Complete OTP verification when prompted.
- Search for a user.
- View account information.
- Save the changes.

Expected Result

User information is updated successfully while maintaining secure access control.

User Forms Management

The User Forms module stores healthcare assessment forms submitted by users.

User Alias	Contact	Form	Actions
CHKR-2-030221	09624277210	HIV	Download View
ELNO-3-971002	09927977585	HIV	Download View

RODO-1-920702	09285996722	HIV	Download View
LIRI-1-030503	09763198181	HIV	Download View

Procedure

- Select User Forms.
- Search for a patient's submitted form.
- Open the selected form.
- Review the information.
- Download the document if necessary.

Expected Result

The selected assessment form is displayed and can be downloaded for clinic use.

Provider Transfer History

The Provider Transfer History module displays patient transfer records between LoveYourself treatment hubs.

Patient	From	To	Status	Approved By	Date
chkr-2-21022003	HERO by LoveYourself	Lily by LoveYourself	Pending	—	Mar 31, 2026 18:25

chkr-2-21022003	Lily by LoveYourself	HERO by LoveYourself	Approved	super	Mar 28, 2026 15:53

Procedure

- Open Transfer History.
- Search for a patient.
- Review transfer details.
- Verify approval status.
- View transfer dates and destination clinic.

Expected Result

Transfer records are displayed accurately for continuity of patient care.

Prescription and Refill Management

The Prescription and Refill Management module allows administrators to manage prescription records and medication refill requests.

The screenshot displays the Prescription and Refill Management interface. At the top, there is a navigation bar with a menu icon and a user profile labeled 'super'. Below this, the 'Prescription Records' section features an 'Add Prescription' button and a table with columns: ID, MEDICATION, PICKUP LOCATION, DATE ISSUED, SUPPLY, NEXT REFILL, and STATUS. The table currently shows 'No prescriptions yet'. The 'Refill Requests Review' section follows, with columns: Request, Medication, Request Date, Status, and Action, also showing 'No refill requests found'. At the bottom, there is a 'Refill History' link with an information icon.

Procedure

- Open Prescription Management.
- Search for a patient.
- Review prescription records.
- Approve or update refill requests.
- Save the changes.

Expected Result

Prescription information and refill requests are updated successfully.

Educational Content Management

The Educational Content Management module enables administrators to manage HIV educational resources published in the system.

The screenshot shows the Educational Content Management interface. The top navigation bar includes a menu icon and a user profile labeled 'educ'. Below this is the 'Landing Page Editor' section, which has a series of tabs: Hero, About, Vision, Our Story, Journey, AI, and Videos. The 'Hero' tab is currently selected. Under the 'Hero Section', there are two input fields: 'Hero Title' with the text 'HIV Care and Support System' and 'Hero Description' with the text 'Access confidential, compassionate HIV healthcare designed to protect your privacy and support your well-being.'

Procedure

- Open Educational Content.
- Create or edit educational materials.
- Upload images or supporting documents if necessary.
- Preview the content.
- Publish the updated information.

Expected Result

Educational content is successfully updated and becomes available to users.

Prescription and Refill Management

The Prescription and Refill Management module allows administrators to manage prescription records and medication refill requests.

The screenshot displays the Prescription and Refill Management interface. At the top, there's a header with a menu icon and a user profile 'super'. The main content area is divided into three sections. The first section, 'Prescription Records', features an 'Add Prescription' button and a table with columns: ID, MEDICATION, PICKUP LOCATION, DATE ISSUED, SUPPLY, NEXT REFILL, and STATUS. Below the table, it states 'No prescriptions yet'. The second section, 'Refill Requests Review', has columns: Request, Medication, Request Date, Status, and Action. It also states 'No refill requests found'. The third section, 'Refill History', is partially visible at the bottom.

Procedure

- Open Prescription Management.
- Search for a patient.
- Review prescription records.
- Approve or update refill requests.
- Save the changes.

Expected Result

Prescription information and refill requests are updated successfully.

Educational Content Management

The Educational Content Management module enables administrators to manage HIV educational resources published in the system.

The screenshot shows the Educational Content Management interface. The top header includes a menu icon and a user profile 'educ'. The main section is titled 'Landing Page Editor' and contains a row of tabs: Hero, About, Vision, Our Story, Journey, AI, and Videos. The 'Hero' tab is selected, displaying the 'Hero Section' with a 'Hero Title' field containing 'HIV Care and Support System' and a 'Hero Description' field containing 'Access confidential, compassionate HIV healthcare designed to protect your privacy and support your well-being.'

Procedure

- Open Educational Content.
- Create or edit educational materials.
- Upload images or supporting documents if necessary.
- Preview the content.
- Publish the updated information.

Expected Result

Educational content is successfully updated and becomes available to users.

User Guide

User Registration

Step 1 – Basic Information

It illustrates the first step of the registration process, where new users provide their basic personal information required to create an account.

The screenshot shows the 'Create Your Account' page, which is Step 1 of 6 in the registration process. The page has a dark blue header with navigation links: Home, About, Features, HIV Information, Find a Hub, Login, and Book Appointment. The main content area is split into two sections. On the left, a blue box with a white icon of a person in a medical coat and the word 'Registration' below it, with the text 'Complete all required fields to submit your application'. On the right, a white box with the title 'Create Your Account' and a progress bar showing 'Step 1 of 6' and '17%'. Below the title, it says 'Fields marked with * are required.' There are four input fields: 'Username*' (with placeholder 'Enter username'), 'Email*' (with placeholder 'Enter email'), 'Password*' (with placeholder 'Enter password'), and 'Confirm password*' (with placeholder 'Confirm password').

Procedure

- Click the Register button on the Login page.
- Enter the required basic information.
- Verify that all fields are completed correctly.
- Click Next.

Expected Result

The system proceeds to the next registration page.

Step 2 – Contact Information

It illustrates the page where users enter their contact information.

The screenshot shows the 'Basic Information' page, which is Step 2 of the registration process. The page has a dark blue header with navigation links: Home, About, Features, HIV Information, Find a Hub, Login, and Book Appointment. The main content area is split into two sections. On the left, a blue box with a white icon of a person in a medical coat and the word 'Registration' below it, with the text 'Complete all required fields to submit your application'. On the right, a white box with the title '+ Basic Information' and a progress bar showing 'Step 2 of 6' and '33%'. Below the title, it says 'Fields marked with * are required.' There are several input fields: 'First name*' (with placeholder 'First name'), 'Middle name' (with placeholder 'Middle name (optional)'), 'Last name*' (with placeholder 'Last name'), 'Suffix' (with a dropdown menu showing 'None'), 'PHHealth Number' (with placeholder 'Enter PHHealth Number'), 'PHSys Number' (with placeholder 'Enter PHSys Number'), 'Contact number*' (with placeholder 'Mobile/Telephone Number'), and two checkboxes: 'Not enrolled in PHHealth' and 'No PHSys Number'. At the bottom, there are two buttons: 'Previous' and 'Next'.

Procedure

- Enter your mobile number.
- Enter your email address.
- Review the information.
- Click Next.

Expected Result

The system saves the entered information and proceeds to the next step.

Step 3 – Personal Information

Figure 5 illustrates the page where users provide additional personal details.

The screenshot shows the 'Personal Details' registration page. On the left, a blue sidebar contains a 'Registration' icon and the text 'Complete all required fields to submit your application'. The main content area is titled 'Personal Details' and includes a progress bar at the top. The form is divided into two columns. The left column contains fields for: Mother first 2 letters (text), Birth order (text), Age (text), Sex Assigned at Birth (dropdown), Current residence city (text), Permanent residence city (text), and Place at birth city (text). The right column contains fields for: Father first 2 letters (text), Birth date (text), Age in months (text), Gender identity (dropdown), Current residence province (text), Permanent residence province (text), and Place at birth province (text). A 'Previous' button is at the bottom left and a 'Next' button is at the bottom right.

Procedure

- Complete all required personal information.
- Review the entered data.
- Click Next.

Expected Result

The system proceeds to the next registration page.

Step 4 – Address Information

Figure 6 illustrates the location and residency information page.

The screenshot shows the 'Location & Status' registration page. On the left, a blue sidebar contains a 'Registration' icon and the text 'Complete all required fields to submit your application'. The main content area is titled 'Location & Status' and includes a progress bar at the top showing 'Step 4 of 6' and '67%'. The form is divided into two columns. The left column contains fields for: Is Filipino (dropdown), Civil status (dropdown), Number of children (text), and Currently pregnant (dropdown). The right column contains fields for: Other nationality (text), Living with partner (dropdown), and Currently pregnant (dropdown). A 'Next' button is at the bottom right.

Procedure

- Enter the complete residential address.
- Select the required location information.
- Click Next.

Expected Result

The address information is saved successfully.

Step 5 – Education and Employment

Figure 7 illustrates the page where users provide educational and employment information.

The screenshot shows the 'Education & Employment' registration page. On the left, a blue sidebar contains a 'Registration' icon and the text 'Registration: Complete all required fields to submit your application'. The main content area is titled 'Education & Employment' and includes a note: 'Fields marked with * are required'. The form is divided into two columns of fields:

- Left Column:**
 - Highest education attained* (No grade completed)
 - Currently working* (Yes)
 - Previous occupation (Previous occupation in the past 12 months (if any))
 - Worked overseas* (Yes)
 - Work abroad location (Where were you based abroad?)
 - Last country worked (Country you worked in)
- Right Column:**
 - Currently in school* (Yes)
 - Current occupation (Enter your current occupation (if any))
 - Worked abroad past 5 years* (Yes)
 - Use return from abroad (Year returned from last visit (e.g., 2020))
 - Work type* (On-ship)
 - Last port of call (Last port of call for seafarers)

Navigation buttons at the bottom include 'Previous' and 'Next'.

Procedure

- Complete the educational background.
- Enter employment information if applicable.
- Click Next.

Expected Result

The system proceeds to the review page.

Step 6 – Review and Confirmation

It illustrates the final registration page where users review all information before submitting.

The screenshot shows the 'Review & Confirm' registration page. On the left, a blue sidebar contains a 'Registration' icon and the text 'Registration: Complete all required fields to submit your application'. The main content area is titled 'Review & Confirm' and includes a note: 'Fields marked with * are required'. The form is titled 'Review Your Information' and displays the following details:

- Account Details:**
 - Username: HB
 - Email: oscar@gmail.com
 - Note: Use your username. You'll need it to log in.
- Personal Details:**
 - Mother: ON
 - Father: ON
 - Birth Order: 1
 - Birth Date: Apr. 2, 2017
 - Generated Identifier: QW5W-1-02012017

Navigation buttons at the bottom include 'Previous' and 'Confirm & Submit'.

Procedure

- Review all entered information.
- Correct any incorrect details.
- Click Submit Registration.

Expected Result

The registration request is successfully submitted.

User Login

The Login page allows registered users to securely access their account.

The screenshot shows the 'Login' page of the HIV Care system. On the left is a large illustration featuring a doctor, a shield with 'HIV', a microscope, and various medical symbols. On the right is a white login form with a blue header. The form includes fields for 'Username' and 'Password', a 'Forgot password?' link, a blue 'Continue' button, and a 'Don't have an account? Register' link at the bottom. The top navigation bar is dark blue with links for Home, About, Features, HIV Information, Find a Hub, Login, and Book Appointment.

Procedure

- Enter your registered email address.
- Enter your password.
- Click Login.

Expected Result

The system redirects the user to the OTP verification page.

OTP Verification

The OTP page provides an additional layer of security by verifying the user's identity.

The screenshot shows the 'OTP Verification' page of the HIV Care system. On the left is the same large illustration as the login page. On the right is a white verification form with a blue header. The form features a lock icon, the title 'OTP Verification', a subtitle 'Enter the 6-digit code sent to your email', a field for 'OTP Code', and 'Back' and 'Continue' buttons at the bottom. The top navigation bar is identical to the login page.

Procedure

- Open the OTP email.
- Copy the verification code.
- Enter the code.
- Click Verify.

Expected Result

The user successfully logs into the system.

AI Chat Support

The AI Chat Support provides HIV-related educational information and assists users in navigating the system.

Procedure

- Open AI Chat Support.
- Type your question.
- Click Send.
- Read the chatbot's response.

Expected Result

The chatbot provides an appropriate response based on the user's inquiry.

User Dashboard

The User Dashboard provides a summary of appointments, notifications, prescription refills, and quick access to system features.

Procedure

- Log in to the system.
- Review dashboard information.
- Select a shortcut to access a desired feature.

Expected Result

The dashboard displays current user information and available actions.

User Profile

The Profile page displays the user's account information while protecting personal identity through system-generated identifiers.

Procedure

- Open Profile.
- Review personal information.
- Update editable information if necessary.
- Save changes.

Expected Result

The updated profile information is successfully saved.

Clinic Services

The Clinic Services page displays all available healthcare services offered by the clinic.

Procedure

- Open Services.
- Browse available healthcare services.
- Select the desired service.
- Click Book Appointment.

Expected Result

The system redirects the user to the appointment scheduling page.

Appointment Scheduling

The Appointment Scheduling module allows users to book appointments online.

Procedure

- Select a preferred provider.
- Choose an available appointment date.
- Select an available time slot.
- Review appointment details.
- Click Confirm Appointment.

Expected Result

The appointment request is successfully submitted for approval.

Service-Based Assessment Form

Users complete a service-specific assessment form before their appointment.

Procedure

- Complete all required fields.
- Review the entered information.
- Click Submit.

Expected Result

The completed assessment form is successfully saved.

Notifications

The Notification module displays appointment reminders, system announcements, and appointment status updates.

Procedure

- Click the Notification icon.
- Review recent notifications.
- Open a notification to view complete details.

Expected Result

The selected notification is displayed successfully.

Appointment Management

The Appointment Management page allows users to monitor the status of their appointments.

Procedure

- Open My Appointments.
- Select an appointment.
- Review appointment details and status.

Expected Result

The appointment information is displayed successfully.

User Records

The User Records page allows users to view submitted forms and healthcare records.

Procedure

- Open My Records.
- Select a record.
- Review the information.

Expected Result

The selected record is displayed.

Prescription and Refill Management

The Prescription and Refill Management module enables users to view prescription records and request medication refills.

Procedure

- Open Prescription & Refill.
- Review current prescription information.
- Select Request Refill if eligible.
- Submit the refill request.

Expected Result

The refill request is successfully submitted for clinic review.
